

Following our successful 2nd group, we are organizing another online course for **front-end programming!**

During the online course "introduction to front-end programming" given by experienced programmers:

- You will learn to program in HTML, Javascript & CSS
- The basics of algorithms will be explained
- Extra online workshops are offered in LinkedIn, job interviewing, and SCRUM
- Extra tutoring in English language is available
- You will learn to work with Slack and GitHub

For whom?

- Participants living in Rotterdam and neighboring cities
- Those who want to improve their prospects for perspective

How does it work?

- The course lasts 4 weeks and can be done from home
- There is a lesson in programming every workday morning
- Following the lesson, you continue on your own using the provided teaching materials
- Your teacher is available every day to answer questions about the material
- Once a week there's an extra workshop and tutoring in English language
- Every week you will be tested on about the skills learned
- After 4 weeks you can program in HTML, Javascript and CSS

What do we expect from you?

- Motivation, ability to research, and the intention to persevere
- Affinity with IT and software development
- Availability for 4 to 6 hours a day, for 4 weeks
- You have a laptop and WIFI connection
- Basic English language skills
- Registration with CV and motivation letter

The course starts
August 3rd!

Register before **July 28**
